

**YOUR OPPORTUNITY TO JOIN THE U.S. GOLD CLUB**

If you are looking for more than fun and games on your computer and would like to have more background information on companies, programmers and programs, we would be delighted to share this with you. Through a regular newsletter, we will give you direct insight into future products and allow you a forum to exchange your views with other members.

**EXCLUSIVE ENROLMENT OFFER**

Every new member will receive a U.S. Gold sweatshirt, badge, poster, and membership card. Your name will be added to our database to receive our regular newsletter – all for only £9.99! Extra sweatshirts can be ordered by club members only at the reduced rate of £6.99 each. Don't forget to specify your size when ordering.

## On The Ground

Once you have landed safely, your hovercraft is repaired, item by item. Next, refuelling takes place, and finally, your bombs are reloaded. To abort any of the ground sequences and move on to the next simply press the fire button. You may abort the entire sequence at any time by lifting off the runway.

## Control Displays

Your craft may be damaged by any of the following:

- hit by enemy gunfire
- crashing into enemy craft
- crashing into objects on the ground

When hit, the command bar turns red momentarily.

The damage incurred from a hit is shown as follows:

- F—fuel leak
- B—bomb dropping gear is damaged (intermittent bombing)
- M—decreased manoeuvrability
- G—guns damaged (intermittent firing)

## Command Bar Colours

**RED**—if the command bar turns red, you have sustained an enemy hit.  
Check command bar for specific damage.

**BLUE**—The command bar turns blue when you are at the same altitude as an enemy craft on the screen. Thus, you can shoot it down.

**BROWN**—When the command bar turns to brown you are at strafing altitude.

**YELLOW**—The FLASHING yellow condition of the command bar indicates extreme danger. You are flying too low and will crash at any moment.

## Options

Press OPTION for the option menu. Press OPTION again to move the arrow to your choice. Press SELECT to change your option selection. PRESS START to start the game.

**NORMAL CONTROL**—pull joystick forward to climb, back to descend.

**PILOT CONTROL**—pull joystick back to climb, forward to dive.

**GRAVITY**—Hovercraft will drop in altitude if the joystick is released.

**NO-GRAVITY**—Hovercraft will remain at steady altitude when the joystick is released.

**BOMB-TARGET**—must bomb the terrain sequencer to activate next phase.

**TOUCH-TARGET**—touch the terrain sequencer to activate next phase.

To stop a game in progress press the SPACE-BAR. To resume play, press any other key. There is no time penalty in the rating system, for pausing the game.

## Hints

Complete your mission as quickly as possible. Your final ranking is based not only on the points that you have accumulated, but also the time elapsed.

Practice flying low above the ground. Many points can be gained by strafing and quick pinpoint bombing.

**GOOD LUCK!**

# LOADING FOR ATARI

## Cassette

Pull the release lever above the keyboard towards you to open the cartridge door of the computer. If there are any cartridges in the slots, remove them and close the cartridge door.

Insert the program cassette into the cassette recorder with the label side up. Press the play button on the cassette recorder until it locks in the down position. Hold down the start button on your computer and turn on the power switch. After you hear a beep from your computer, press the return key. The program will load in about four to five minutes.

## Disk

Pull the release lever above the keyboard towards you to open the cartridge door. If there are any cartridges in the slots, remove them and close the cartridge door.

Turn on your disk drive and wait for the busy light to go out. Insert the BLUE MAX program disk into the disk drive label side up with the section towards the rear of the disk drive. Close the disk drive door and turn on the power of your computer. The program will load in about 30 seconds.

# LOADING FOR THE COMMODORE 64

## Cassette

Turn on the computer and place the cassette in the cassette player, making sure it is fully rewound. Hold down the SHIFT key and press the RUN/STOP keys. Program will run automatically.

## Disk

Insert the disk and type: Load "\*", 8,1 and press RETURN. Program will load automatically.

# OBJECTIVE

You are Max Chatsworth IX, a direct descendant of Max Chatsworth of BLUE MAX fame. You have lived and breathed his legend, and now fate calls upon you to fight an evil so foul that he could not even have imagined it.

The FURXX empire has extended its iron hand to Earthbase Gamma IV, and captured it. The inhabitants that were not killed in the struggle, were enslaved and sent to FURXX conversion processors to be drained of their life force, so that the FURXX Time Masters could extend their own lifespans.

Having effected an easy victory, the FURXX now intend to invade all earth colonies and finally capture the earth, herself.

You have been armed with a deadly new gravonic-penetrator, whose power beam cuts through FURXX defence screens like a laser through a tin can!

Rebels have set up supply bases in secret locations on the planet surface where you will be refuelled and your penetrators recharged. Also, your hovercraft is equipped with gravonic annihilator bombs, cloned from the same technology.

Your mission is to penetrate enemy defences, destroy their hoverfields, and finally destroy the symbol upon which the FURXX empire is built. And all this must be accomplished IMMEDIATELY, for the fate of the world rests in your hand.

# INSTRUCTIONS

## Beginning the Game

Press START and push forward on your joystick to lift your hovercraft from the runway of your home field. See "OPTIONS" for joystick control choices. To begin the terrain scrolling move your joystick diagonally up and to the left. When the craft touches the upper border of the screen the terrain will start to scroll under you. You may stop the scrolling at anytime, by moving in the down right diagonal direction until the hovercraft shadow hits the bottom border of the screen.

## Targets

All the enemy installations and vehicles are your targets. There are factories, defence facilities, supply vehicles etc. All of these are open to both bombing and strafing attacks. There are also 2 types of special targets.

The first is a Shield Enhancer. This device is diamond in shape, with a pulsing centre. In order to get an extra shield you must land on the enhancer.

The other is called the Terrain Sequencer. You must, depending on the option chosen, either bomb or land on the sequencer to progress to the next enemy hoverfield. The sequencer looks like a small disk with a rotating core. NOTE: Use the OPTIONS menu for choosing bomber touch options in sequencer interaction.

## Strafing

Air-to-ground strafing can be accomplished by reducing your altitude to between 18-24 and pressing the fire button. As an additional visual indicator, the command bar will turn brown to indicate that you are at the correct altitude for strafing. You will shoot in the direction of flight when the terrain is scrolling, or the direction of last movement when the screen is stationary.

## Bombing

Dive-bombing is accomplished by pressing the fire button while moving your hovercraft down. Obviously, you will descend while dropping bombs, be especially aware of your altitude while bombing.

## Landing

When a friendly runway approaches, a tone will sound and a green "R" will appear in the lower righthand portion of the command bar. To land, simply steer your craft onto the runway surface. The "R" will change into a flashing "G", indicating contact with the ground. You may also land by stopping the scrolling first, and then descend straight down onto the tarmac.

Please complete the order form and return with a cheque or postal order made payable to U.S. Gold Limited, to U.S. Gold Club, Unit 10, Parkway Industrial Centre, Heneage Street, Birmingham B7 4LY. Please allow 21 days for delivery.
